Joshua Yim Wei Xiang

Strategy & Transactions Associate at EY | Aspiring Data Scientist | Data Analytics | Applied Machine Learning | Cloud Computing
Petaling Jaya

Summary

Strategy and Transactions associate (Valuation, Modelling & Economics) at Ernst & Young. Graduated with a bachelors degree in Statistical Data Science at Heriot-Watt University Malaysia but always still eager to learn more about the world of data.

I am deeply passionate about visualizing data science solutions and solving non-conventional problems where machine learning methods were never utilized before. Excited to potentially be a part of the driving force that transforms the world into a tech savvy one.

Experience

EY

Associate - Strategy & Transactions

August 2021 - Present (5 months)

Kuala Lumpur, Federal Territory of Kuala Lumpur, Malaysia

Port Operation Optimization

- In collaboration with EY Singapore's Valuation, Modelling and Economics (VME) team, carried out statistical analysis on a major port in Malaysia with visualizations such as cumulative distribution functions and boxplots

- Created 2 machine learning models; a Random Forest Classifier and Random Forest Regression model to assist in decision making when suggesting a use case for the models in the client's day-to-day operations

Jetty Proposal

- Assisted in preparing a proposal to the public sector on the construction of a jetty along a famous coastal area in Malaysia

- Populated the proposal presentation deck with inputs from external consultants such as their contributions in the jetty construction especially during the planning & implementation phases

Property Valuation Review

- Assisted on reviewing a valuation report performed by an external valuator on an industrial property in Malaysia
- Conducted market research on similar transactions within the locality of the valued property
- Prepared a draft on the internal memorandum of the valuation review

Hong Leong Assurance Berhad

Product Development Intern

May 2020 - August 2020 (4 months)

Petaling Jaya, Selangor, Malaysia

Internship period of 3 months from 27th May 2020 to 27th August 2020

- Supported my colleagues in customer documentation checking (e.g. Product Disclosure Sheets, Sales Illustrations)
- Performed extensive research on competitors' products (e.g. similarities, strength of company's current products, etc)
- Carried out performance analysis on investment-linked funds directly affecting the performance of investment-linked insurance products
