Emerio Sdb Bhd

Java Developer

January 2012 - January 2015 (3 years 1 month)

Malaysia Cyberjaya, Selangor

Hewlett-Packard (Cyberjaya) - Intelligent Offer Generation

IOG is a business rule driven application that generates relevant offers like parts, products or warranties to HP

product users. Offers are shown by visiting the HP site or given by agents attending a user call.

Offers can be based on the type of call or from the purchase history of the user, or the purchase histories of

other users that have similar profile as the user being offered to.

- Wrote INFOR Interaction Advisor scripts based on the required business rules; logic rules are written in

JavaScript.

- Coordinated with different teams to ensure the rules and expected offers are correct.

Assisted in performance monitoring.

-

Developed a simple web UI to submit queries and to display offers. This is used by QA to test the

backend services while waiting for the actual interface to complete.

Technologies: Web Services, JSP, SoapUI, Infor IA, Oracle 10g

Hewlett-Packard (Cyberjaya) - WorkFlow Suite

Ordering, invoice and billing system.

- Analyzed and applied Change Requests

-

Performed code reviews

Technologies: Oracle JDeveloper, OracleWeblogic, Oracle Workflow Suite, SQL Developer, EJB 3.0, JavaScript, J2EE, Webservices, JMS/ EMS

HCL Sdn Bhd

IT Consultant

November 2010 - December 2011 (1 year 2 months)

Malaysia TPM, KL

Great Eastern Life (JalanAmpang, KL)

- Portal feature enhancements

-

Developed custom portlets

- Enhanced existing applications based on business unit

- Involvement from requirements gathering, design, construction, change deployment to application support

Technologies: Eclipse Galileo, Liferay5.x /6, Tomcat 5.x, CSS, JSP, Struts 1.0 , JavaScript, JMeter,

Liferay DeveloperStudio 1.0.0, J2SE, J2EE, Webservices

Pointwest Technologies Inc
Software Engineer
March 2008 - November 2010 (2 years 9 months)
ICS Team (Logistics)

J.B. Hunt Integrated Capacity Solutions (ICS)'s mission is to provide alternative transportation capacity solutions to customers who desire a significant J.B. Hunt asset presence. -

Rapid Response support

-

On site deployment; temporarily assumed project coordinating duties: requirement gathering, analysis

and task allocation.

Technologies: Eclipse 3.4, Bea WebLogic Server 9.2, CSS, DWR, Struts, SVN, JavaScript, IceFaces,

Webservices

NWA Corporate Security Website (Airline)

CS-EM is a portlet development project that consists of 2 systems: Corporate Security website (CWS)

and Emergency Management website (EMW).

Corporate Security is the main source of information for all security questions at NWA, and is responsible for

interpretation and dissemination of security information to those individuals who need access to these

information. As required by the Transportation Security Administration, NWA should provide a central place

for this information and must be in compliance with all other governmental security requirements.

Emergency Management is the main source for safety information and maintains IATA membership. The IATA Operational Safety Audit (IOSA) is the benchmark for global safety management in airlines. To maintain its IATA membership and registry status, IATA IOSA standards require NWA to have a communication system that enables an exchange of operationally relevant information throughout its emergency management system.

Geospatial Solutions Inc

Web Developer

August 2006 - March 2008 (1 year 8 months)

National Advocacy Group Marketing Campaign Portal - ASP to WebSphere Conversion

The challenge was to convert a legacy web application from ASP.NET to IBM WebSphere Portal.

The Marketing Central Portal enables nationally dispersed leaders and coordinators of a US based National Advocacy Membership Organization to conveniently plan, manage and evaluate Marketing and PR campaigns (jobs).

The envisioned end-result is a unified, intuitive and seamless portal that leverages on the power, modularity, scalability, code reusability and long-term viability of the IBM WebSphere Portal environment.

-

Assumed team lead role and developer

Technologies: IBM RAD V7.0, Websphere Portal Server V6.0, Windows 2003 server, Microsoft SQL Server; , CSS, JavaScript, JSF Portlets

Department of Agriculture Enhanced Website - ESPCS

Analysis, design and construction of custom portlets: online inquiry, staff and DA officials directory

Technologies: IBM RAD V6.0, IBM DB2 V8.1,CSS, JavaScript, Struts Portlets, Servlets, JSP

Education

University Of The Philippines
